Datasheet

eptos™ Publication Manager

eptos™ Online Master Data Repositories support companies and organizations to work with consistent master data throughout the organization.

eptos™ Publication Manager supports the definition of consistent publication structures required to render and publish technical documents or catalogs

eptos™ Product Master Data Repository

Today, companies deploy a wide range of IT-systems to support business processes and exchange information. One of the critical success factors is the reliable administration and electronic exchange of materials master data, product master data and services master data between systems within the organization as well as to suppliers and customers. Our global markets require the support of increasing numbers of different language versions.

Errors due to misunderstandings, wrong interpretation or translations of words, features or symbols result in high expenses and drive product and service prices.

eptos™ Product Master Data Repositories support companies and organizations to overcome these problems and support the development and provision of corporate wide consolidated and multi-language product master data. Consistent master data will be provided to all connected application systems (ERP, CAx, PDM, eCatalogs, etc.). Consolidated product master data reduces the complexity of your business process.

eptos™ Publication Manager

The eptos™ Publication Manager supports you to minimize the time and effort required to render and publish your technical documents. With only a few clicks eptos™ will provide professional high-quality documents according to your corporate style guidelines.

Supports the creation, maintenance and provision of consistent publication structures for professional technical publications.

Supports the user to create and compose content elements for publications (e.g. Datasheet, product catalogs, etc.)

Publication structures defined are provided for Rendering-Plug-In, Spec Sheet Generator or external Rendering Engines (e.g. DITA-Rendering engines) for publishing product information in form of Webpages, datasheets, product catalogs or other publications.

Fully integrated in the eptos™ Master Data environment, leveraging other eptos™ modules like Dictionary Manager, Item Manger, Template Manager, Item Manager Graph Generator, etc.

Business Use cases are Product Data Sheet, Preferred Part Catalog and Product Catalog.

Features

- Definition of publishing topics templates according to your corporate style guidelines (CI-definitions)
- Easy rendering of documents based on released data content on the fly
- Generation of topics including content from other eptos™ Manager modules
- Integration of documents from external DMS systems
- Definition of topics and maps in DITA-XML
- Integration of data transformations based on XSLT
- Supports open standards as OntoML (ISO13584-32), DITA-XML, DITA-OT, XQuery, XSLT 2.0

Target group

eptos™ customers who wish to create technical documentation: product manufacturer / product suppliers / plant operators / machine manufacturers
