eptos™ Report Manager

Effortlessly generate your desired reports with ease!

Are you struggling to effectively visualize and report performance data such as processing and hold times for specific statuses?

Are you looking for a solution to help you unlock the full potential of your business processes through better data visualization and reporting?

With our powerful **eptos™ Report Manager**, easily generate customized reports and drive better decision-making.

eptos™ Report Manager

Information insights at a Glance!

Reporting on data base elements, work progress and KPIs has become essential in our projects today. Customers have to be flexible and independend in creating costomized reports for their business needs.

eptos™ Report Manager is designed for supporting customers to create, design and customize their own reports. eptos™ Report Manager comes with a dedicated reporting database for the independent creation of reports. The database comes with comprehensive documentation to enable to create own reports. For generation of reports customers can use the data visualization software of own choice. This also allows the generation and visualization of reports which combines data from different data sources.

eptos™ reporting database is constantly updated from eptos™ software modules when users are working.

Benefits

Secure environment
The decoupled reporting database is updated from eptos™ modules as users are processing data and thus provides a secure environment for generating reports. It is ensured that production data is not affected when creating, testing or executing reports.

Comprehensive Documentation
eptos™ Report Manager comes with documentation of reporting database tables for the creation of reports.

Use Data Visualization Software of your choice
eptos™ report database is accessible from external data visualization software. Customers can use the Data visualization software of own choice to generate and design reports that meet customer's requirements.

Combined reports
Full access to eptos™ report database from own data visualization software enables the creation of combined reports from eptos™ reporting database and other data sources.
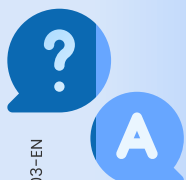

Features

- Reporting database which is constantly synched for up-to-date reports
- Comprehensive reporting database documentation for report generation
- Design and create reports with the Data Vizualization Software of choice (e.g. MS Power BI)

The roll out of eptos™ Report Manager will be implemented in stages across various eptos™ modules, starting with eptos™ 6.3.
